

## Story 3: *T-Rex* as a skilled predator

### How did *T-Rex* hunt for food and what did it eat?

#### 故事三：霸王龙是熟练的捕猎者 霸王龙是如何觅食和吃什么？

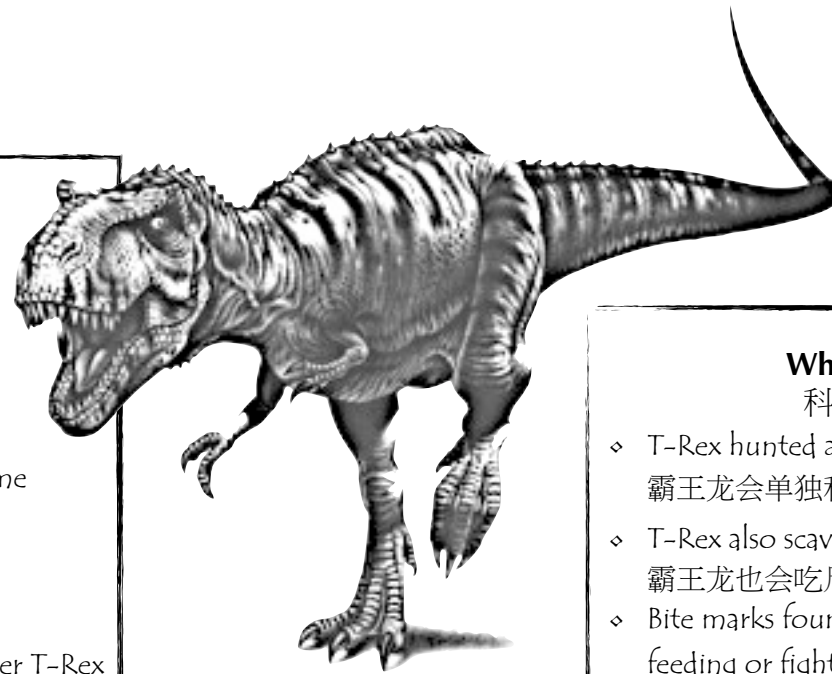

We know that *T-Rex* was the king of the dinosaurs, but we are still not sure what they ate. The diagram below shows what scientists know and what they can guess about what *T-Rex* ate. Use the information given below to add notes under the headings given.

我们知道霸王龙是恐龙之王，但我们不确定牠们是吃什么的。以下图片说明了科学家所知及推断霸王龙是吃什么的。请使用以下资料并在标题上填上注释。

#### What Scientists Know

##### 科学家知道些什么？

- ◇ *T-Rex* was a carnivore  
霸王龙是肉食性动物
- ◇ *T-Rex* ate herbivorous (plant eating) dinosaurs  
霸王龙吃草食性（食植物）恐龙
- ◇ *T-Rex* could eat hundreds of pounds of meat at a time  
霸王龙一次可以吃掉数百磅肉
- ◇ *T-Rex* got its food through hunting  
霸王龙通过捕猎而获得食物
- ◇ *T-Rex* bones show deep bite marks created by another *T-Rex*  
霸王龙的骨头上有被同类咬过的痕迹。

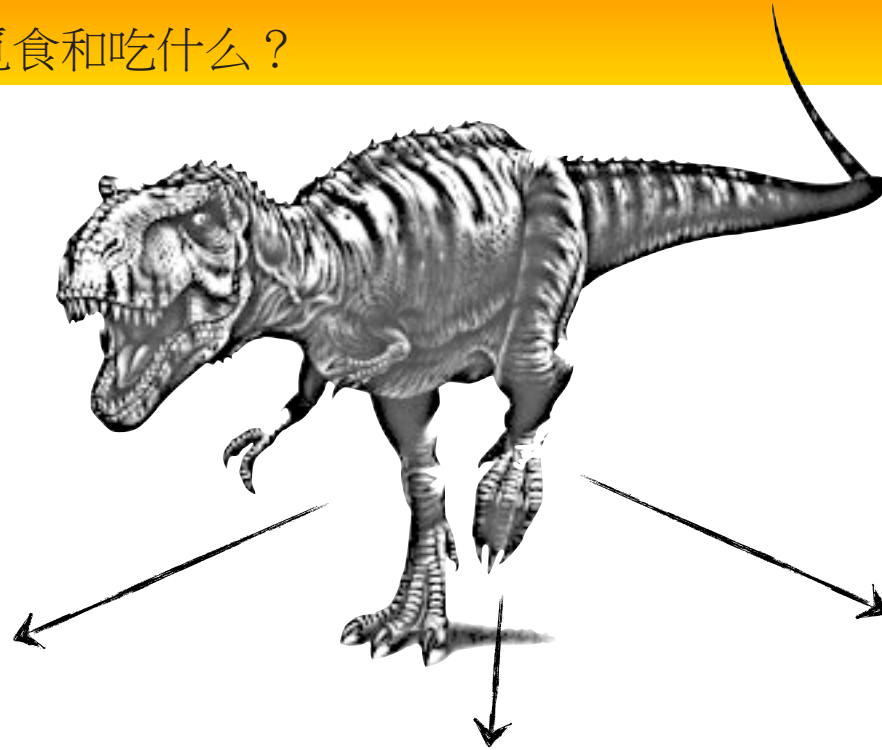

#### What Scientists Suspect

##### 科学家怀疑些什么？

- ◇ *T-Rex* hunted alone and in packs  
霸王龙会单独和成群去觅食
- ◇ *T-Rex* also scavenged for food by eating carcasses  
霸王龙也会吃尸体腐肉
- ◇ Bite marks found in *T-Rex* bones could be from feeding or fighting injuries  
骨头上的咬痕可能是喂哺或互相打架时做成的

## How did T-Rex hunt for food and what did it eat?

霸王龙是如何觅食和吃什么？

### What did *T-Rex* Eat?

霸王龙吃什么？

- T-Rex was a huge carnivore
- T-Rex ate herbivorous (plant eating) dinosaurs
- T-Rex could eat hundreds of pounds of meat at a time.

- 霸王龙是巨大的肉食性动物。
- 霸王龙吃草食性（食植物）恐龙。
- 霸王龙一次可以吃掉数百磅肉。

### How did *T-Rex* find its food?

霸王龙怎样觅食？

- T-Rex got its food through hunting
- T-Rex also scavenged for food by eating carcasses
- T-Rex hunted alone and in packs

- 霸王龙以捕猎为生。
- 霸王龙也会吃尸体腐肉。
- 霸王龙会单独和成群去觅食。

### Was *T-Rex* a cannibal?

霸王龙会吃同类吗？

- Evidence from the bones of T-Rex show deep bite marks created by another T-Rex.
- T-Rex may have eaten each other.

- 霸王龙骨头上深深的咬痕证实曾同类咬过。
- 霸王龙可能会吃同类。
